Abstract (Basic): **ZA 8106640 A**

Compsn. is a mixt. of modified starch (I), a farinaceous substance (II) and water, pref. in wt. ratio about 1:5:2.5. (II) is esp. wheat flour and the compsn. can also contain salt (at about 0.02 wt. pts. of the compsn.) and a colouring agent.

Nuts, esp. peanuts, are coated with this compsn., pref. using nuts and coating in wt. ratio 10:9, then fried in oil. Partic. (I) and (II) and dry blended, a portion of this mixed with water and some of the wet mix applied to the nuts. A portion of the dry blend is then applied and sequential treatment with wet mix and dry blend repeated at least once, pref. twice.

After frying the compsn. forms a salty crisp biscuit around the nuts. (Provisional Basic previously advised in Week E42
